Fairpoxy Earns USDA Certified Biobased Product Label

Wormerveer, September 16, 2021 — Fairpoxy announced today that it has earned the U.S. Department of Agriculture (USDA) Certified Biobased Product label. The products:

- Fairpoxy® Laminating Resin and Hardener
- Fairpoxy® Top Casting Resin and Hardener

are now able to display a unique USDA label that highlights its percentage of biobased content.

Third-party verification for a product's biobased content is administered through the USDA BioPreferred Program, an initiative created by the 2002 Farm Bill (and recently reauthorized by the 2018 Farm Bill). One of the goals of the BioPreferred Program is to increase the development, purchase and use of biobased products.

The USDA Certified Biobased Product label displays a product's biobased content, which is the portion of a product that comes from a renewable source, such as plant, animal, marine, or forestry feedstocks. Utilizing renewable, biobased materials displaces the need for non-renewable petroleum-based chemicals. Biobased products, through petroleum displacement, have played an increasingly important role in reducing greenhouse gas (GHG) emissions that exacerbate global climate change.

Biobased products are cost-comparative, readily available, and perform as well as or better than their conventional counterparts.

“We are delighted to have earned the USDA Certified Biobased Product label. It rewards our efforts to have a biobased epoxy that is more environmentally friendly whilst still offering excellent characteristics and ease of use. With this label our customers can now have full confidence that Fairpoxy epoxy is biobased.” said Melchior Pons, director of Fairpoxy.

Fairpoxy® is a registered trademark.

"We applaud Fairpoxy for earning the USDA Certified Biobased Product label," said Vernell Thompson, USDA BioPreferred Program. "Products from Fairpoxy are contributing to an ever-expanding marketplace that adds value to renewable agriculture commodities, creates jobs in rural communities, and decreases our reliance on petroleum."

According to a report that USDA released in July 2019, biobased products contributed \$459 billion to the U.S. economy in 2016 (a 17% increase from 2014) and support, directly and indirectly, 4.6 million jobs. The report's research team estimates the reduction of fossil fuels and associated GHG emissions from biobased products equivalent to approximately 12 million metric tons of carbon dioxide (CO₂) prevented as of 2016.

The increased production of renewable chemicals and biobased products contributes to the development and expansion of the U.S. bioeconomy - where society looks to agriculture for sustainable sources of fuel, energy, chemicals, and products.

About Fairpoxy

Fairpoxy is the new biobased epoxy brand in Europe, operating from The Netherlands. The Fairpoxy range consists of a lamination system intended for construction of boats, surfboards, etc. And a top casting system for table tops, counter tops and hot coats.

About the USDA BioPreferred Program and Certified Biobased Product label

The BioPreferred Program is a USDA-led initiative that assists the development and expansion of markets for biobased products. The BioPreferred Program is transforming the marketplace for biobased products through two initiatives: mandatory purchasing requirements for Federal Agencies and Federal contractors and voluntary product certification and labeling.

Biobased products span a diverse range of applications, such as lubricants, cleaning products, chemicals and bioplastics. The USDA Certified Biobased Product label communicates a product's biobased content. Expressed as a percentage, biobased content is the ratio of non-fossil organic carbon (new organic carbon) to total organic carbon in a product. New organic carbon is derived from recently-created materials. The total organic carbon in a product consists of new organic carbon and old organic carbon that originates from fossil carbon materials, such as petroleum, coal, or natural gas. More than 3,500 products have earned the USDA Certified Biobased Product label. To learn more about the USDA Certified Biobased Product label please visit www.biopreferred.gov, and follow on Twitter at <http://twitter.com/BioPreferred>.
